FOR IMMEDIATE RELEASE

On November 6th, 2009 Kent MacLeod, BScPharm of Nutri Chem Pharmacy was presented PCCA Canada's 2009 Compounding Pharmacist of the Year award!

The 2009 Compounding Pharmacist of the Year presentation was held during PCCA Canada's Regional Seminar at the Crowne Plaza Hotel in Toronto, ON. Kent was surrounded by his family, friends and colleagues when he heard the news for the first time. A video was presented to Kent which featured interviews and greetings from various people who expressed their respect and admiration for his dedication to patients and pharmacy.

Kent is one of the leading world authorities on the impact of nutrition on the biochemistry of individual disease states. Well-known for his expertise in Bio-Identical Hormone replacement and women's issues, he has the unique ability to simplify the complex aspects of pharmaceutical and nutraceutical approaches so that patients walk away not only healthier but better educated.

Kent attended the University of Toronto and received his Bachelor of Pharmaceutical Chemistry in 1980. He has continued his education by attending PCCA events annually; he also sends his staff to events so the pharmacy as a whole continues to offer patients in Ottawa the very best medication available.

Kent has owned Nutri-Chem Pharmacy in Ottawa, ON for almost 30 years, and is founder and president of the International Centre for Metabolic Testing (ICMT); which is the first Canadian clinical laboratory for metabolic and nutritional testing. Kent is also the founder and Clinical Director of Nutrichem Biomedical Centre where over 200 assays are performed on blood and urine – looking at nutrients, hormone levels and brain chemistry. With the information found, individual compounds of nutrients and hormones can be formulated to meet individual requirements.

Kent is a previous recipient of the Ontario Pharmacists Association Distinguished Practice Award as well as the 2004 Outstanding Service Award for Innovation. He is the author of a book entitled: "Down Syndrome and Vitamin Therapy: Unlocking the Secrets of Health, Behavior and Intelligence".

PCCA Canada is pleased to highlight such a successful career; we wish continued success and our heart-felt congratulations to Kent MacLeod, PCCA Canada's 2009 Compounding Pharmacist of the Year.

PCCA is a membership based organization whose goal is to strengthen the role, position and skills of member compounding pharmacists who in turn, meet the unique healthcare needs of patients through PCCA's products, support, shared innovations and education. PCCA is the only chemical company owned and operated by a network of pharmacists, who give other pharmacists access to devices, chemicals, training, consulting, marketing and technical support.
